PROFESSIONAL SUMMARY

Motivated and detail-oriented computer science student with a strong foundation in software development, web technologies, and problem-solving. Seeking an internship to gain hands-on technical experience and apply innovative solutions to real-world challenges. Enthusiastic about leveraging programming and design skills to contribute to team success.

SKILLS

- **Programming Languages:** Java, Python,
 - **Web Development:** HTML, CSS, JavaScript,
 - **Software Development:** Object-Oriented Programming (OOP)
 - **Version Control:** Git, GitHub
 - **Problem-Solving:** Debugging, Algorithm Optimization
 - **Additional Skills:** Design Thinking, Prototyping, Technical Documentation
-

EDUCATION

Bachelor of Science in Computer Science (Expected: July 2026)

Francis Marion University, Florence, SC

University of South Carolina, Columbia, SC

PROJECTS

1. Travel Fuel Calculator (Java)

- Designed and developed a program that calculates the anticipated fuel requirements, cost of fuel, and estimated travel time based on user inputs, including location and destination.
- Implemented modular programming concepts to ensure code readability and scalability.

2. Income Tax Calculator (Java)

- Created a program that calculates and outputs the estimated income tax based on a user's annual income input.
- Applied conditional logic and financial algorithms to ensure accurate computation.

3. Access Code Generator (Java)

- Developed a program that generates secure, random 30-character access codes for authentication purposes.
